

Empowering Africa to drive technology

About Us

WorkCube is a platform that provides access to tech talents in-which corporate bodies or individuals can hire full time or part time employees.

WorkCube as a technology company operates by training recent graduates in mobile and web technologies (software Engineering) thereby, producing a large number of experts in software development, equipped to render expert services to both local and International clients.

WorkCube sets to create opportunities for African graduates to Learn, Work and Earn in WorkCube's paid internship program, thereby creating job opportunities for recent graduates and introducing fresh, motivated and creative/innovative experts in software development to provide an even better service for corporate and individual bodies.

TUMEKUTANA

Tumekutana (a Swahili word meaning “we have come together”) was born of a vision to provide a way for African Presbyterian Reformed women’s leaders to meet face to face for mutual support and fellowship. It is a fellowship of women leaders who confess the Lord Jesus Christ as God and Savior according to the Scriptures and therefore seek to fulfill together their common calling to honor and glorify the one God, Father, Son and Holy Spirit.

Tumekutana is currently made up of women from 22 African Countries, with partnerships in the U.S., Canada, Scotland, Switzerland, Germany and more.

FPCE

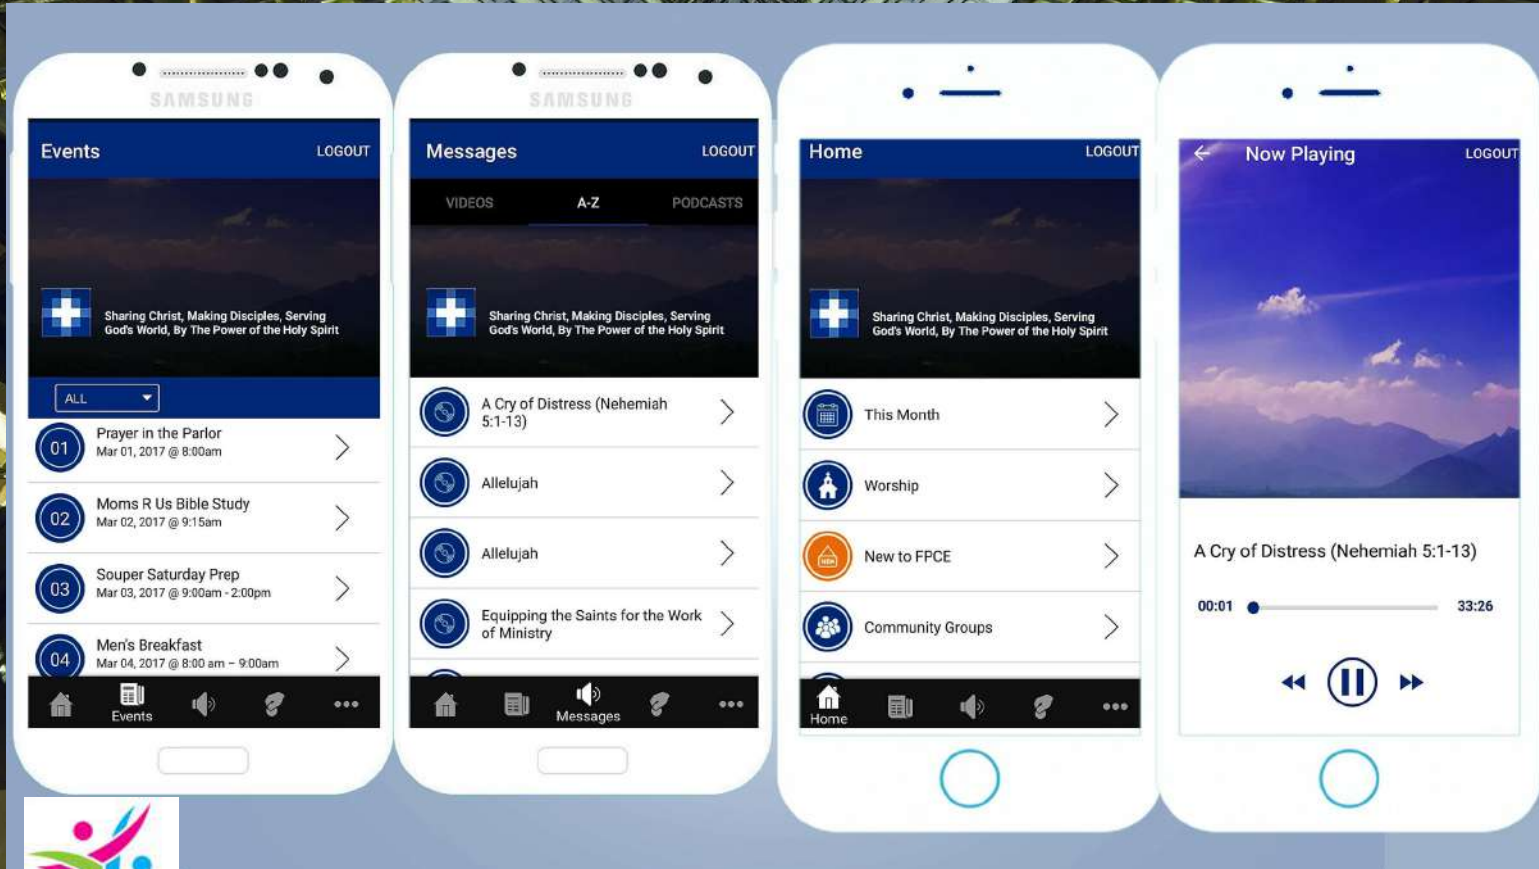

First Presbyterian Church of Evanston is a Presbyterian Church in Evanston, U.S.A. We built a mobile app for the church to connect with their church members easily and keep them up to date with happenings in the church. On the mobile app, the church members can listen to sermon messages (in Video and audio format), read church bulletins and announcements, be aware of the latest church events, receive messages from the church and also get to know more about the church and her mission.

The mobile app runs on IOS and Android.

Some screenshot of the app can be found below:

Our Portfolio

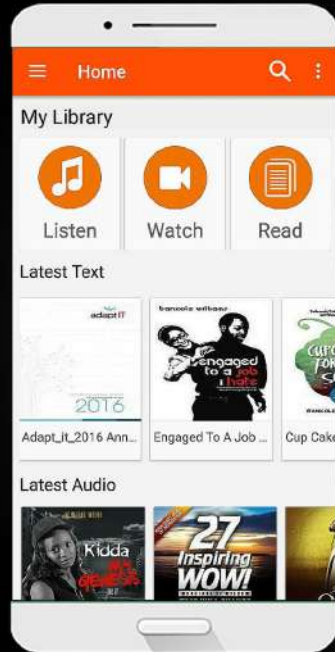

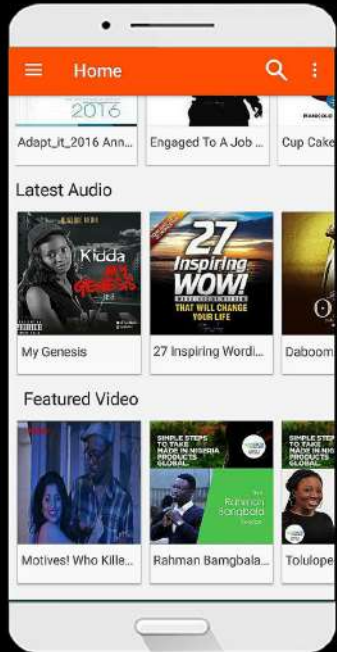

Nerve Mobile

Nerve's solutions offers African people better access to locally relevant digital content.

We built an Android Mobile App for this platform with a pdf/epub reader, an MP3 player, a Video player module and a download manager, all integrating with the NerveFlo digital store.
